BECOME A HACKBEANPOT MENTOR

WHAT IS HACKBEANPOT?

HackBeanpot is the largest non-school-affiliated hackathon in Greater Boston. We bring together students from all backgrounds to learn, build, and connect in a welcoming, beginner-friendly environment.

WHY YOU SHOULD BE A MENTOR

1. Help student hackers as they turn their ideas into real projects.
2. Share your technical, design, product, or career experience
3. Give back while building your leadership and mentorship skills

Your guidance can help students gain confidence, grow their skills, and leave the hackathon inspired to keep building.

YOUR ROLE AS A MENTOR

Every hacker team will complete a required mentor checkpoint early in the hackathon to refine their idea, scope, and direction. Mentors will also offer support through office-hour-style sessions throughout the weekend, answering technical, design, product, or career questions.

TIME COMMITMENTS

2–3 flexible hours during hackathon weekend · Virtual or in person - in person preferred
